About Of Our

MISSION & VISION

At PT. KOLINK, we are committed to leading digital transformation across Asia by delivering innovative and customized IT solutions. Our mission and vision guide every project and partnership we undertake.

Our Core Services

At KOLINK, we specialize in delivering comprehensive IT solutions tailored to your business needs. From software development to IT infrastructure support, our core services are designed to drive efficiency and innovation.

Key Business Solutions

We offer a wide range of business solutions that empower your organization to embrace digital transformation. Our expert team ensures every project delivers measurable value and sustainable growth.

About Of Our

Software & Solution Company

KOLINK is a trusted leader in delivering innovative software development, cloud-based solutions, UI/UX design, and IT human resource support tailored to accelerate your digital transformation.

01

Software Development

We specialize in creating custom software applications that meet your unique business needs, utilizing cutting-edge technologies and proven methodologies to ensure scalability and performance.

02

cloud -based solutions

Our cloud services enable flexible, secure, and efficient management of your IT resources, supporting business continuity and remote accessibility with industry-leading platforms.

03

UI / UX Design

Our design team crafts user-centered interfaces and experiences that boost engagement, usability, and customer satisfaction across web and mobile platforms.

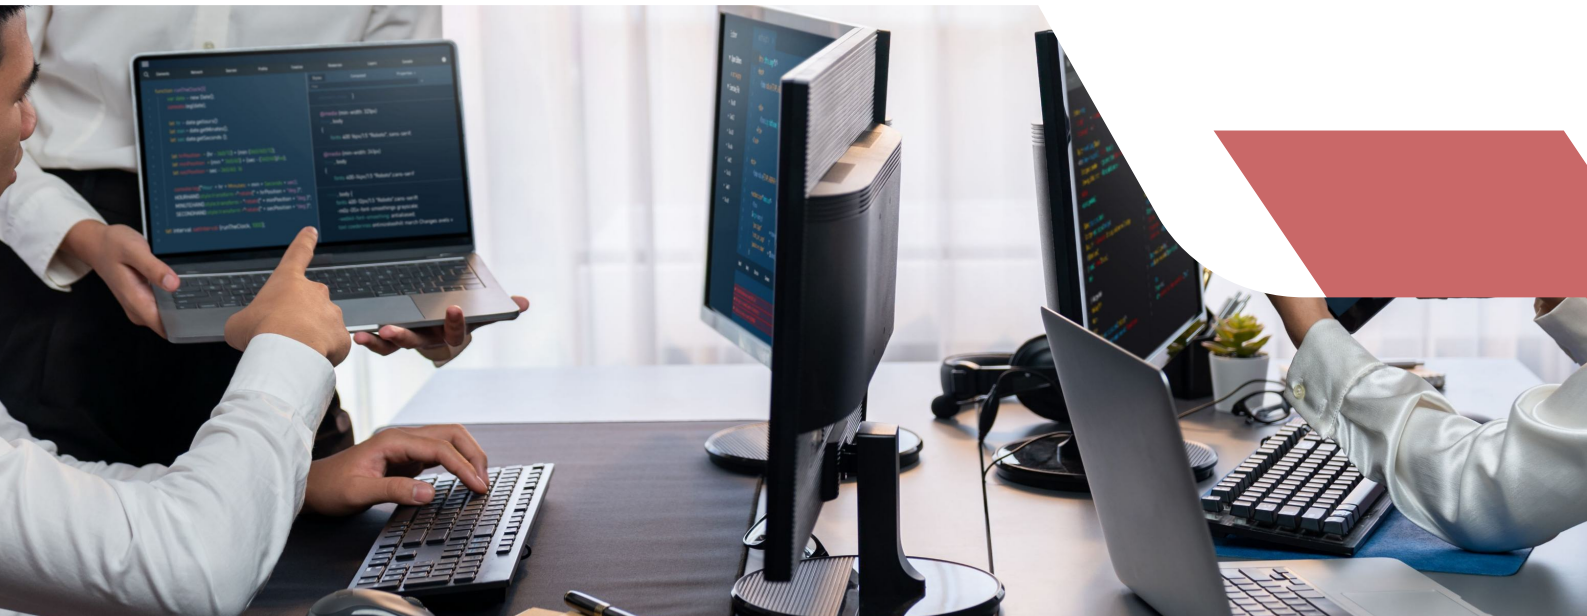
04

IT Human Resources Support

We provide skilled IT professionals and comprehensive support services to strengthen your workforce, ensuring seamless operation and maintenance of your IT systems.

Multi Platform

As a software development company, we consistently stay abreast of the latest technologies and platforms to ensure alignment with industry trends. Below are some of the technologies and platforms we employ in the development of software solutions for our clients.



About Of Our

Project Software & Solution History

Attendance Control System — Software

ACS (Attendance Control System) is an advanced attendance solution designed to help businesses and institutions manage attendance easily and efficiently. With a low initial budget, ACS enables you to reduce upfront investments without compromising on quality and comprehensive features.

Warehouse Allocation & Logistic Tracker — Software

WALT is a professional Warehouse Management System designed to optimize storage capacity, streamline logistics processes, and significantly enhance operational efficiency through advanced inventory tracking and management solutions.

Product Management System — Software

PMS is a comprehensive software that manages product lifecycles, streamlines inventory control, optimizes order processing, enhances accuracy, and boosts operational efficiency to reduce waste in your supply chain.

Global Cloud Intergated Logistics System — Solution

As a next-generation logistics solution launched in 2016, G-SABIS is a cloud-based global logistics integration solution that adopts the latest IT technology to integrate various logistics processes worldwide.

Group Ware System — Solution

GroupWare is a total IT solution designed to optimize task management, communication, and cooperation. It offers 23 integrated menus including mail, calendar, messenger, HR, and cloud disk, with multilingual support and mobile access. Built on big data systems, it enhances enterprise productivity through secure, real-time collaboration.
